Market Dynamics

The rising deficiency of nutrients in soil and soil erosion across the globe is driving market growth. Growing population worldwide is elevating the demand for food products is again fuelling the market growth. However, lack of awareness among farmers about proper usage and availability of cheap alternatives and counterfeit products are likely to hamper the market growth. Whereas, shifting consumer preference towards a nutrient-rich diet along with this, increasing government initiative to promote the production of the high-yield crop are likely to offer an opportunity over the forecast period.

The report covers Porter's Five Forces Model, Market Attractiveness Analysis and Value Chain analysis. These tools help to get a clear picture of the industry's structure and evaluate the competition attractiveness at a global level.

Additionally, these tools also give inclusive assessment of each application/product segment in the global market of agricultural micronutrients.
