Market Dynamics

The advantage offered by coal tar enamel such as resistant to bacterial corrosion, penetration of plant roots, dissolution of petroleum and its products as well as resistant to soil stress is fueling market demand. Increasing demand for strong adhesion, low water absorption, and good insulation is again boosting the market growth. On the other hand, the fluctuating cost of raw material is likely to hinder the market growth. Whereas, resistance to cathodic stripping and long life is anticipated to augment demand over the forecast period.

The report covers Porter's Five Forces Model, Market Attractiveness Analysis and Value Chain analysis. These tools help to get a clear picture of the industry's structure and evaluate the competition attractiveness at a global level.

Additionally, these tools also give inclusive assessment of each application/product segment in the global market of coal tar enamel.
