### **Market Dynamics**

The increasing demand for automobiles across the globe is primarily driving the market growth. The increasing focus towards the aesthetic appearance of the vehicle along with rising disposable income is again accelerating the market growth. However, the high cost of raw material is likely to hamper the demand. Whereas, shifting preference of manufacturers towards artificial or synthetic leather due to its less production cost is expected to create potential demand over the forecast period.

The report covers Porter's Five Forces Model, Market Attractiveness Analysis and Value Chain analysis. These tools help to get a clear picture of the industry's structure and evaluate the competition attractiveness at a global level.

Additionally, these tools also give inclusive assessment of each application/product segment in the global market of automotive interior leather.
