Market Dynamics

The increasing demand for premium segment vehicles is primarily driving the market growth. High demand for adaptive lighting is again accelerating market growth. Along with this, lighting regulations for better visibility and safety are further accelerating the demand. However, the high cost of LED lights and low penetration of advanced lighting in hatchback, compact sedan, and entry-level SUV is expected to hamper the market growth. Whereas, the evolution of new technologies in automotive lighting is likely to create potential opportunities over the forecast period.

The report covers Porter's Five Forces Model, Market Attractiveness Analysis and Value Chain analysis. These tools help to get a clear picture of the industry's structure and evaluate the competition attractiveness at a global level.

Additionally, these tools also give inclusive assessment of each application/product segment in the global market of automotive lighting.
