

According to the global [Software Defined Networking \(SDN\) Market](#) report published by Value Market Research, the market is expected to touch USD 69,372.8 Million by 2024, with a CAGR of 48.8% growing from USD 4,283.6 Million in 2017. This is a tailored made research report providing informative data and various critical aspects of the market such as market outlook, market share, growth, and trends. Further, the report also offers evidence-based information that helps to transform clients business and achieve their business goals. Moreover, the report also highlights the key strategy of top players. Additionally, this report covers a wide spectrum of services such as the latest technology trend, market opportunity analysis, and competitive landscape.

The report also covers detailed competitive landscape including company profiles of key players operating in the global market. The key players in the software defined networking (SDN) market includes Alcatel-Lucent S.A., Big Switch Networks Inc., Brocade Communications Systems, Inc., Cisco Systems, Inc., Dell Inc., Extreme Networks, Inc., Hewlett-Packard Enterprise Company, International Business Machines Corporation, Juniper Networks, Inc., NEC Corporation and VMware Inc. An in-depth view of the competitive outlook includes future capacities, key mergers & acquisitions, financial overview, partnerships, collaborations, new product launches, new product developments and other developments with information in terms of H.Q.

Market Dynamics

Growth in cloud computing services among IT organizations have boosted the growth of the software-defined networking market. In addition, the growing adoption of mobile devices has tremendously raised over the past few years, leading to an increasing need for efficient data networks across private and public sectors. This, in turn, is boosting the growth of software-defined networking industry. Furthermore, the rising need for technological advancement among enterprises offers new growth opportunities to market players to expand their market presence. However, lack of standardization & implementation and also lack of awareness among enterprises is likely to hamper the market growth.

This detailed market study is centered on the data obtained from multiple sources and is analyzed using numerous tools including porter's five forces analysis, market attractiveness analysis and value chain analysis. These tools are employed to gain insights of the potential value of the market facilitating the business strategists with the latest growth opportunities. Additionally, these tools also provide a detailed analysis of each application/product segment in the global market of software defined networking (SDN).

Market Segmentation

The broad software defined networking (SDN) market has been sub-grouped into solution, vertical, and end-user. The report studies these subsets with respect to the geographical segmentation. The strategists can gain a detailed insight and devise appropriate strategies to target specific market. This detail will lead to a focused approach leading to identification of better opportunities.

By Solution

- Physical Network Infrastructure
- Virtualization And Control Software
- Professional Services
- SDN Applications & Network Services

By Vertical

- IT
- Consumer Goods and Retail
- BFSI
- Defense
- Telecom
- Healthcare
- Others

By End-User

- Telecommunication Service Providers
- Cloud Service Providers
- Enterprises

Regional Analysis

Furthermore, the report comprises of the geographical segmentation which mainly focuses on current and forecast demand for software defined networking (SDN) in North America, Europe, Asia Pacific, Latin America, and Middle East & Africa. The report further focuses on demand for individual application segments in all the regions.
