

According to the global [Dental Biomaterials Market](#) report published by Value Market Research, the market is expected to touch USD 11.4 BN by 2025, with a CAGR of 7.5% growing from valued USD 6.9 BN (by revenue) in 2018. This is a tailored made research service providing informative data and various critical aspects of the market such as market outlook, market share, growth, and trends. Further, the report also offers evidence-based information that helps to transform clients business and achieve their business goals. Moreover, the report also highlights the key strategy of top players. Additionally, this report covers a wide spectrum of services such as the latest technology trend, market opportunity analysis, and competitive landscape.

The report also covers detailed competitive landscape including company profiles of key players operating in the global market. The key players in the dental biomaterials market include 3M Company, Carpenter Technology Corporation, Danaher Corporation, Dentsply Sirona, Inc., Geistlich Pharma AG, Kuraray Co., Ltd., Medtronic PLC, Royal DSM, Straumann Holding AG and Zimmer Biomet Holdings, Inc. An in-depth view of the competitive outlook includes future capacities, key mergers & acquisitions, financial overview, partnerships, collaborations, new product launches, new product developments and other developments with information in terms of H.Q.

Market Dynamics

The increasing access to biomaterial implant across the globe is a major factor fuelling the demand of dental biomaterials. Rising geriatric and edentulous population resulting in high demand for advanced dental treatments is further fuelling the market growth. In addition to this, an increase in expenditure on dental and oral care along with a growing number of dental clinics is pushing the demand for dental biomaterials. Whereas increasing adoption of novel adhesives, resin cement in CAD/CAM and other digital technologies is expected to boost demand in the forecast period. However, the high cost of biomaterials may restrict the market growth.

This detailed market study is centered on the data obtained from multiple sources and is analyzed using numerous tools including porter's five forces analysis, market attractiveness analysis and value chain analysis. These tools are employed to gain insights of the potential value of the market facilitating the business strategists with the latest growth opportunities. Additionally, these tools also provide a detailed analysis of each application/product segment in the global market of dental biomaterials.

Market Segmentation

The broad dental biomaterials market has been sub-grouped into type, application and end-user. The report studies these subsets with respect to the geographical segmentation. The strategists can gain a detailed insight and devise appropriate strategies to target specific market. This detail will lead to a focused approach leading to identification of better opportunities.

By Type

- Metallic Biomaterials
- Ceramic Biomaterials
- Polymeric Biomaterials
- Metal-Ceramic Biomaterials
- Natural Biomaterials

By Application

- Implantology
- Prosthodontics
- Orthodontics
- Others

By End-User

- Dental Product Manufacturers
- Dental Laboratories
- Dental Hospitals And Clinics
- Dental Academies And Research Institutes

Regional Analysis

Furthermore, the report comprises of the geographical segmentation which mainly focuses on current and forecast demand for dental biomaterials in North America, Europe, Asia Pacific, Latin America, and Middle East & Africa. The report further focuses on demand for individual application segments in all the regions.
