Market Dynamics

The rising pet population along with the increasing adoption of pet across the globe is driving the market growth. Also, the rising trend of pet humanization is fuelling market growth. Additionally, increasing awareness regarding the nutritional benefits of minerals, dietary fiber, carotenoids, and omega-3 fatty acids in pet nutrition is further accelerating market growth. On the other hand, price sensitivity and limited availability of ingredients may hamper market growth. Whereas, shifting preference of customers towards premium pet food and novel food ingredients is likely to offer an opportunity during the forecast period.

This detailed market study is centered on the data obtained from multiple sources and is analyzed using numerous tools including porter's five forces analysis, market attractiveness analysis and value chain analysis. These tools are employed to gain insights of the potential value of the market facilitating the business strategists with the latest growth opportunities. Additionally, these tools also provide a detailed analysis of each application/product segment in the global market of pet food ingredients.
