Market Dynamics

The increasing number of surgical cases such as gynecology and obstetrics surgery, gastrointestinal surgery and cardiovascular surgery is driving the market growth. Additionally, growing technological advancements in surgical procedures along with improving healthcare schemes, and favorable reimbursement policies across the globe are further fuelling market growth. On the other hand, lack of proper sterilization and increasing preference for minimally invasive procedures for wound healing may restrict market growth. Whereas, advancement in suture design technology such as antibacterial-coated sutures and barbed sutures are expected to create a potential opportunity for surgical sutures in upcoming years.

This detailed market study is centered on the data obtained from multiple sources and is analyzed using numerous tools including porter's five forces analysis, market attractiveness analysis and value chain analysis. These tools are employed to gain insights of the potential value of the market facilitating the business strategists with the latest growth opportunities. Additionally, these tools also provide a detailed analysis of each application/product segment in the global market of surgical sutures.
