Market Dynamics

Rising elderly population followed by an increase in the prevalence of cancer is driving the market growth. Increased funding to the companies performing research for the development of more effective drugs is further fueling the market growth. Also, ongoing R&D in gene therapy and molecular biotechnology for treating brain and spine-related disorders is likely to push the market growth. Despite this, relatively higher expenditure for GBM treating drugs is the key challenge for the market growth.

This detailed market study is centered on the data obtained from multiple sources and is analyzed using numerous tools including porter's five forces analysis, market attractiveness analysis and value chain analysis. These tools are employed to gain insights of the potential value of the market facilitating the business strategists with the latest growth opportunities. Additionally, these tools also provide a detailed analysis of each application/product segment in the global market of glioblastoma treatment drugs.
